Subject: msft settlement

We common people depend on the developers to make things easy for us. If there was not Windows, millions of people could never use a computer. Apple was out there for yrs., with a graphical user interface (GUI) but it took Windows which was fairly priced at about 80 dollars, to unlock the many millions of users nowadays-- IT IS NOT BECAUSE WE HAVE NO CHOICE-----WE CHOSE Windows over IBM OS2, We chose Windows over Linux, and over Apple, and especially over UNIX and Xenix. Now there is a monopoly--if u were a physician, in 1990, there was absoutely no softwaware other than UNIX/Xenix--and it cost thousands of dollars,and could only run certain types of applications . Please, please, please make this stupid lawsuit go away!!!!!!!!!!!!
